

ESSENTRA

Release Ref: Essentra Italy – New Site Opening **Issue Date:** 18 November 2014

ESSENTRA'S INVESTMENT IN ITALY SUPPORTS RAPIDLY EXPANDING COMPONENTS PRODUCT RANGE

Consistent with its Vision 2015 strategic objectives, and to support its growth ambitions, Essentra plc (“Essentra” or “the Company”) today officially opened its new, purpose-built Components distribution centre in Bologna, Italy. This new 2,500m² facility provides the necessary space to accommodate Essentra’s rapidly expanding product range in the strategically important Italian market, where over 4,000 new products and more than 28,000 parts are already featured in the latest catalogue – all of which are available from stock for rapid delivery.

Commenting on the official site opening, Colin Day, Chief Executive, said:

“The investment in this new facility underscores the commercial significance of the Italian market to Essentra, and our commitment to providing our Components customers with even greater product choice and stock availability, combined with the best possible delivery and service proposition. With our growing range, we are convinced that our new distribution warehouse means that we are even better placed to act as a “one stop shop” and to add value to our customers, both in terms of meeting their exacting product requirements as well as their challenging delivery needs.”

Notes to Editors:

Essentra plc is a FTSE 250 company and a leading international supplier of speciality plastic, fibre, foam and packaging products. Through its four principal operating divisions, Essentra focuses on the light manufacture and distribution of high volume, essential components which serve customers in a wide variety of end-markets and geographies.

Component & Protection Solutions

The Components business is a global market leading manufacturer and distributor of plastic injection moulded, vinyl dip moulded and metal items. Operating units in 26 countries serve a very broad industrial base of customers with a rapid supply of primarily plastic products for a variety of applications in industries such as equipment manufacturing, automotive, fabrication, electronics and construction.

The Pipe Protection Technologies business specialises in the manufacture of high performance innovative products from commodity resins to engineering-grade thermoplastics and polymer alloys for use in a range of end-markets. Locations in four countries, combined with a wide distributor network, serve customers around the world.

Porous Technologies

A global market leading developer and manufacturer of custom fluid handling components, engineered from a portfolio of technologies that includes bonded and non-woven fibre, polyurethane foam and porous plastic. Representing leading innovations used in healthcare, consumer and industrial applications, its enabling components are found in a wide range of products from medical diagnostics tests to advanced wound care pads, inkjet printer cartridges, writing instruments, clean room wipes and air fresheners. Customers in over 56 countries are served from six manufacturing facilities with research and development centres supporting the division globally.

Packaging & Securing Solutions

A leading global provider of packaging and securing solutions to a diversified blue-chip customer base. The division focuses on delivering value adding innovation, quality and service to customers through a range of cartons, tapes, leaflets, foils and labels for the healthcare, consumer and specialist packaging, point of sale and paper & board industries. The division is also a leading supplier of authentication technologies and identity solutions. Customers in over 100 countries are served from facilities operating in ten countries.

Filter Products

The only global independent cigarette filter supplier. The nine worldwide locations, including a UK-based research facility and three regional development centres provide a flexible infrastructure strategically positioned to serve the tobacco industry. The division supplies a wide range of value adding high quality innovative filters, packaging solutions to the roll your own sector and analytical laboratory services for ingredient measurement for the industry.

Other

The Extrusion business is a leading custom profile extruder located in The Netherlands and offers a complete design and production service. One of the first companies to extrude plastics in 1956, it is now one of Europe's most advanced suppliers of co-extrusions and tri-extrusions to all branches of industry.

Headquartered in the United Kingdom, Essentra's global network extends to 33 countries and includes c. 5,700 employees, 42 principal manufacturing facilities, 64 sales & distribution operations and 5 research & development centres. For further information, please visit www.essentra.com.
