Front Cover:

Filtrona's tectorguard protects wires and hoses from abrasion and other damage. It is produced in our Plastic Profile and Sheet extrusion operation and supplied by our Protection and Finishing Products businesses.

Filtrona plc at a glance

Plastic Technologies

Plastic Technologies produces, sources and distributes protection and finishing products, self-adhesive tear tape and certain security products as well as proprietary and customised plastic extrusions and packaging items for consumer products.

Plastic Technologies

Protection and Finishing Products

Our facilities in the UK, Canada, Continental Europe, Mexico, the US and Brazil provide rapid supply of primarily plastic products for general protection, masking, electrical, fastening, security and finishing applications.

Coated and Security Products

Under the Payne brand our operations in the UK, the US, Brazil, Germany, France, Spain, India, Indonesia and Singapore, provide self-adhesive tear tape and coated film products for use in brand promotion, document authentication, personal identification and other security applications.

Plastic Profile and Sheet

Through our locations in the US, Mexico and the Netherlands, we are a leading supplier of thermoplastic profile, sheet and speciality tubes for a selected range of applications including lighting, fencing, signs and displays, refrigeration, medical and traffic control.

Operating review

Mark Harper

Filtrona has continued to perform well with revenues of £282.9m (2005: £251.9m) up 12.3%

Filtrona is an international, market leading, speciality plastic and fibre products supplier with activities segmented into Plastic Technologies and Fibre Technologies.

For the six months ended 30 June 2006, Filtrona has continued to perform well with revenues of £282.9m (2005: £251.9m) up 12.3%. Operating profit before intangible amortisation was £32.4m (2005: £30.0m) up 8.0%. Profit before tax was £28.9m (2005: £26.3m) up 9.9%. At 30 June 2006, net debt was £117.4m with gearing improving to 85.1% (2005: 93.0%). Adjusted earnings per share were 8.5p (2005: 7.7p) up 10.4%.

The Board has declared an interim dividend up 8.0% to 2.3p per share (2005: 2.13p) which will be paid on 27 October 2006 to shareholders on the register on 29 September 2006 with an ex-dividend date of 27 September 2006.

Underlying like-for-like revenues at constant exchange rates were up 8.0%. Underlying like-for-like operating profits at constant exchange rates, and taking account of the benefit in 2005 from lower central services costs in the pre-demerger period, were also up 8.0%.

Plastic Technologies

Plastic Technologies produces, sources and distributes protection and finishing products, self-adhesive tear tape and certain security products as

well as proprietary and customised plastic extrusions and packaging items for consumer products.

Plastic Technologies delivered excellent revenue and profit growth driven by sustained investment in marketing programmes, new products and productivity improvements. Reported revenues were £151.5m (2005: £136.1m) up 11.3% with underlying like-for-like revenues at constant exchange rates up 7.0%. Reported operating profit increased to £22.1m (2005: £18.6m) up 18.8% with underlying like-for-like operating profit at constant exchange rates up 14.5%. Margins improved by 90 basis points to 14.6% (2005: 13.7%).

Protection and Finishing Products continued to achieve strong growth. At Moss, the continued success of new product introductions and further good progress in Continental Europe more than offset the challenging trading conditions in the UK which are expected to persist. The expansion of the Moss North European distribution hub was completed and this will yield important service benefits to the Continental European operations. Growth from the Central European operations was encouraging. The disposal of a small non-core plastic promotional products business was completed in February.

The Skiffy business continued to perform ahead of the forecasts set at the time of the acquisition in 2004 as a

Plastic Technologies revenue was £151.5m (2005: £136.1m) up 11.3% and operating profit was £22.1m (2005: £18.6m) up 18.8%

result of increased investment in marketing programmes and productivity improvements. A new Skiffy distribution operation in Poland is planned to commence operations in the second half of the year.

Alliance continued to progress as planned. A new manufacturing facility was established in Sao Paulo, Brazil as scheduled and further investment in tooling is under way. The Alliance Express network continued to trade well, benefiting from the ongoing marketing programme. The configuration of the Erie, Pennsylvania central warehouse was modified to achieve improved stocking density.

Performance at the MSI oil country tubular goods thread protector business was again particularly strong buoyed by the sustained high levels of drilling activity in the oil and gas sector. Additional investments in new production machinery and tooling at Houston, Texas and Vera Cruz, Mexico are delivering significant benefits.

Coated and Security Products continued to progress with satisfactory revenue growth. Volumes of printed tapes for promotions were depressed as some important customers in the tobacco sector reduced promotional activity. The Indonesian operation was relocated to the new Cigarette Filters facility in Surabaya and the printer in Richmond, US was upgraded to facilitate the printing of security

applications. The requirement for productivity upgrades has generated the need for new slitting lines in the UK and US which will be installed during the second half of the year. Supplies of laminate for the new generation UK passport commenced and volumes built steadily through the period. In May the acquisition of the CORGI identity card printing operation was completed and the business has been successfully transferred to the Mold facility in North Wales where a major upgrade programme has been completed. Investment continues to be made in the development of proprietary security technologies for use across the business.

FractureCode has just concluded a three and a half year licence agreement with a major FMCG company and follow up activities are being undertaken after a successful launch at the May Intergraf Symposium. During the first half, investments in building the organisation and in further developing the handheld reader have, as expected, resulted in operating losses. FractureCode is expected to generate a meaningful contribution to Filtrona's profits in 2009.

The **Plastic Profile and Sheet** business achieved very strong growth as sales progressed positively at each of the North American facilities with excellent revenues from the point of purchase and aerospace markets. Performance was also assisted by the closure of the small Phoenix, Arizona facility at the

Operating review

Fibre Technologies revenue was £131.4m (2005: £115.8m) up 13.5% and operating profit was £14.0m (2005: £14.0m)

start of the year and the transfer of volumes to the facilities at Chicago and Tacoma in the US and Monterrey, Mexico. Significant productivity and performance improvement was delivered at Chicago. As a result of business growth, facility expansions in the Netherlands and Mexico are due to become operational later in 2006 and early in 2007 respectively.

The Globalpack **Consumer Packaging** business in Brazil experienced a return of the tough trading conditions which characterised the majority of 2005. Although the business has continued to win new customers, margins on existing business have come under pressure due to market overcapacity, particularly in tubes. The third roll-on ball line came on stream successfully at the end of the first quarter and ball volumes continue to grow satisfactorily. The business is focused on both product innovation and operational cost reduction in response to the more challenging market conditions.

Fibre Technologies

Fibre Technologies focuses on the production and supply of special filters for cigarettes and bonded fibre products such as reservoirs and wicks for writing instruments and printers, household products and medical devices.

Fibre Technologies delivered good revenue growth though operating profits were level with the same period in 2005. Revenue was £131.4m (2005: £115.8m) up 13.5% and operating profit was £14.0m (2005: £14.0m). Margins were reduced by 140 basis points from 12.1% to 10.7% and operating profit at constant exchange rates was down 2.8%.

The **Cigarette Filters** business continued to encounter difficult conditions with a mixed performance across its manufacturing facilities. Overall volumes were up 0.3% with an encouraging 17.7% increase in special filters offset as expected by a 19.3% decline in monoacetate filters. The facility at Monterrey, Mexico has continued to incur higher than anticipated costs to achieve the appropriate levels of quality and productivity resulting in losses in the period. Forthcoming volume reductions in North

The Board is confident that
Filtrona will continue to
progress satisfactorily

America, driven by an important customer's decision to transfer significant volumes of cigarette manufacturing out of that region, have generated the need for a capacity review. Performance at the UK facility in Jarrow has improved, but the integration of new technologies after the closure of the Swiss operations held back results. In Asia, the transfer of the Indonesian business to a new and larger facility was successfully completed and the volumes produced in this facility are growing rapidly.

The Fibertec **Bonded Fibre Components** business progressed well in the period. The Ningbo, China facility moved into profit as volumes continued to grow due both to production transfers and to new business won in the region. A plant expansion is due to commence later in the year to support the growth being achieved in China. The recovery in household products volumes has continued, new European and Asian business has been won in writing instruments, and significant new projects remain on track for commercialisation in the inkjet printer and medical products sectors. An investment programme to upgrade the facility in Reinbek, Germany is due to commence later in the year.

Prospects

These interim results represent an above trend performance in organic growth terms and Filtrona continues to seek investments to develop its niche market positions. The Board is confident that Filtrona will continue to progress satisfactorily in the second half of the year although financial performance is likely to be affected by a weaker dollar and higher interest rates.

Notes

1. Basis of preparation

This interim financial information has been prepared and approved by the Directors in accordance with the accounting policies that were applied in the preparation of the Company's published consolidated financial statements for the year ended 31 December 2005.

The accounting policies, which conform to IFRS, have been consistently applied to all periods presented.

The figures for the six months ended 30 June 2006 and 30 June 2005 are unaudited and do not constitute statutory accounts of Filtrona within the meaning of Section 240 of the Companies Act 1985. However, the auditor has carried out a review of the figures for the six months ended 30 June 2006 and their report is set out in the Independent Review Report. The comparative figures for the financial year ended 31 December 2005 are not the Company's statutory accounts for that financial year. Those accounts have been reported on by the Company's auditor and delivered to the Registrar of Companies. The report of the auditor was (i) unqualified, (ii) did not include a reference to any matters to which the auditor drew attention by way of emphasis without qualifying their report, and (iii) did not contain a statement under section 237(2) or (3) of the Companies Act 1985.

[#] The number of ordinary shares issued on demerger was used as the weighted average number for the period prior to demerger

6. Property, plant and equipment

During the period Filtrona spent £15.9m on land and buildings, plant and machinery and fixtures, fittings and equipment.

Land and buildings, plant and machinery and fixtures, fittings and equipment with a net book value of approximately £1.1m were disposed of for proceeds of £0.9m.

7. Intangible assets

During the period Filtrona purchased certain assets and the business of the CSL Digital Print division of CORGI Services Limited and, concurrently, entered into a five year agreement with CORGI Group Limited for the exclusive supply of registered gas installer identity cards. The value of this agreement and the customer list attached to the business is included on the balance sheet as an intangible asset.

Independent Review Report to Filtrona plc

Introduction

We have been instructed by the Company to review the financial information for the six months ended 30 June 2006 which comprises the consolidated income statement, consolidated balance sheet, consolidated statement of cash flows, consolidated statement of recognised income and expense and related notes. We have read the other information contained in the Interim Statement and considered whether it contains any apparent misstatements or material inconsistencies with the financial information.

This report is made solely to the Company in accordance with the terms of our engagement to assist the Company in meeting the requirements of the Listing Rules of the Financial Services Authority. Our review has been undertaken so that we might state to the Company those matters we are required to state to it in this report and for no other purpose. To the fullest extent permitted by law, we do not accept or assume responsibility to anyone other than the Company for our review work, for this report, or for the conclusions we have reached.

Directors' responsibilities

The Interim Statement, including the financial information contained therein, is the responsibility of, and has been approved by, the Directors. The Directors are responsible for preparing the Interim Statement in accordance with the Listing Rules of the Financial Services Authority which require that the accounting policies and presentation applied to the interim figures should be consistent with those applied in preparing the preceding annual accounts except where any changes, and the reasons for them, are disclosed.

Review work performed

We conducted our review in accordance with guidance contained in Bulletin 1999/4 issued by the Auditing Practices Board for use in the UK. A review consists principally of making enquiries of Filtrona management and applying analytical procedures to the financial information and underlying financial data and, based thereon, assessing whether the accounting policies and presentation have been consistently applied unless otherwise disclosed. A review excludes audit procedures such as tests of controls and verification of assets, liabilities and transactions. It is substantially less in scope than an audit performed in accordance with International Statements on Auditing (UK and Ireland) and therefore provides a lower level of assurance than an audit. Accordingly, we do not express an audit opinion on the financial information.

Review conclusion

On the basis of our review we are not aware of any material modifications that should be made to the financial information as presented for the six months ended 30 June 2006.
